

To test temperature:

```
x=int(input())
```

```
if(x>=36 && x<=37):
```

```
    print("Body temperature normal")
```

```
else:
```

```
    print("Body temperature is high")
```

To test social distancance

If the persons are not at proper distance a buzzer will be ON

To test no of seats available

Each transport can hold only 50% of peoples so if there are space available there will be a green light shown if not red light will be shown
